**MANUFACTURE OF
SOLAR WATER HEATING SYSTEM**

COMPANY PROFILE

Since its establishment in 2006, millionsun Solar has grown up into a professional solar water system manufacturer, State of the enterprise through the ISO9001 quality system certification, providing first rate service and solutions flat plate solar hot water system for residential and commercial. Along with our original flat plate collector factory we have a newly developed tank factory, support workshop, as well as a system performance testing center, integrating R&D manufacturing, distribution and service.

To provide high-quality solar water heaters, all of our products are manufactured in accordance with European or Australia standards that feature comprehensive quality assurance systems and inspection procedures, and our system has get AS/NZS2712, AS3498 and EN12976 approval. In addition, we can also provide value-added services for customers, like offering technical support, customized system solutions, and market access to assist them in exploring market, thus achieving mutual benefits

Our products have achieved WATERMARK(Australia), OCEANAMARK(Australia), SOLAR KEYMARK (Europe), SRCC, CSA and CE certificate.

Our cooperation features is flexible and diversified , including OEM and ODM service, agent, distribution etc.

MILLIONSUN CERTIFICATES

We have already got WATERMARK(Australia), OCEANAMARK(Australia), SOLAR KEYMARK (Europe), SRCC (America), CSA(Canada), CE and ISO9001 Certificate.

SOLAR FLAT COLLECTOR MANUFACTURE LINE

Millionsun solar Black absorber coating production lines, black absorber coating annual production capacity over 1 million sqm, we hold black absorber coating market capacity of 30% in china.

Millionsun Solar flat collector manufacture line start to made solar flat collector at 2006, there is 50000 sqm for the manufacturing place. We have 2 ultrasonic welded production lines and 1 laser welded production lines, We supply all kinds of flat plate solar collector to client, annual production capacity over 200000 sqm flat collector.

Clean and tidy production environment, Automatic production line, well-established technological process, Strict quality control and regulate the delivery process, ensure quality qualified rate 100% solar water system to customers and without error delivery rate.
