ABOUT ROSE DRY AND ROSE WATER RECOVERY MACHINE

- ◆ Keep Natural color for dried roses
- ◆ Earliest company to do heat pump dry and recovery machine and efficiency is highest.
- ◆ Can recover about 40% more or less rose water .
- ◆ All food level stainless steel material for all machine. With special design to assure food level for dried rose and rose water quality to past lab test with greenfood standard.
- ◆ Automatic control system for all work process.
- ◆ Energy-save machine to save 75% compare with electricity directly.
- ◆ With CE Certificate from SGS

HISTORY FOR ROSE DRY MACHINE WITH RECOVERY SYSTEM

2011 Year

Dryfree begin to research, design and make rose dry machine with recovery system from 2011 year with requirements from customer Tianyuan Rose products development co., Ltd. At that time on China market, rose only dry with common oven and rose factory only get dried rose petals, rose buds without water after dry and also quality of dried rose is not stable. Tianyuan Rose only earliest and biggest rose factory in Pinyin county, Jinan city of China, they hope to develop absolutely new Technology to dry fresh rose with stable quality and recover all rose water to increase additional value for rose products. (Pinyin county is best place for food level rose in China).

With nearly one year to work together to study. design and make sample to test and improve and change again and again. We finally solve all problems and catch with best result. And we increase recovery percentage from less 20% to 35%-40%. All dry machine material we use food-level stainless steel and with special design to assure safe for dried rose petals and rose water. As Customers send rose water and dried rose petals to lab to test with food level and also get Greenfood certificates for all goods.

2012 Year

With help for this new technology dry with recovery system, Tianyuan Rose increase capacity quickly to install 50 sets dry system with very large dry quantity with cool-stock on 2012 year. Then Tianyuan rose develop rose petals for food material for many customers on China and overseas and develop rose sugar, rose jam with rose petals, rose tea with rose buds, rose water for cosmetics products with their brands and rose water drinking.

2013 Year

Then from 2013 year, much more Chinese rose company contact with us to purchase our new technology machine to replace old dry oven or old type dry machine step by step as popular.

2015 Year

From 2015 year, some customers from Bulgaria, India, Turkey or other customers hear about our machine and contact with us or come to our factory to purchase our new dry and recovery machine. Because in Bulgaria, Turkey and Iran as customer only use boil or cool-press for rose water without dried rose petals, rose buds. Or only get dried rose petals, rose buds through common dry oven or solar without rose water like in India and Pakistan. Our new technology machine with recovery system really develop and increase the value for fresh rose in world market.

2017 Year

With more customers from China and world market to contact with us and operate more rose dry and water recovery projects, our customers trust us and ask additional requirements to dry vegetables, Chrysanthemum, Jasmine, Lavender, mint leaf, herbs and recover water during dry process. We already operate one big projects in Hunan province, Qidong county for one company to dry Day lily and recover day lily water for medicine material with very high additional value.

PROJECT EXAMPLE:

Tianyuan Rose Products Development Co. Ltd (www.jntyrose.com)

Tianyuan Rose is earliest rose manufacture company in Pinyin county, China. And with new technology dry with recovery machine from 2012, Tianyuan Rose already become biggest rose products manufacturer with complete product list for rose products include dried rose petals, rose buds for tea, rose sugar, rose jam, rose water for cosmetics and drinking material. Tianyuan also already become famous brand and expand market through OEM for rose material, distribute with many agents with brands to cover all China markets and also export to oversea markets. Tianyuan Rose already work with many big brands like Kellogg group, Oishi, etc.

BULGARIA CUSTOMER

Bulgaria customer contact with us on 2015 after hear about our new technology dry with recovery machine. Bulgaria customer use boil process for rose water and rose oil, but can not get dried rose petals and rose tea. And customers also come to visit Tianyuan Rose to check all details. Bulgaria customer also export most rose water, dried rose tea to China markets.
