

SOLAR WATER TANK

Millionsun Solar's water storage tank workshop to produce stainless steel tank and Vitreous Enamel tank, we make the solar storage tank according to Australia standard. the solar storage tank is well protected against corrosion and hard water. It combines easy assemble and an optimal price / performance. The hot water supply is provided in the hygienic continuous flow and the latest technology.

- + Attractive coating appearance
- + Temperature and pressure relief valve Protect
- + Easy matching to residential solar systems
- + Automatic temperature control. .
- + High quality and long life by optimal corrosion protection
- + Have a long service life
- + Easy installation

Type	Dimension	Back-up
250L	Φ570X1530	Electric Boost / Gas Boost / heat pump
325L	Φ570X1830	Electric Boost / Gas Boost / heat pump
400L	Φ700X1530	Electric Boost / Gas Boost / heat pump

Tank outside

Material Steel sheet and UV coating(thickness 0.5mm)

Tank inside

Material SUS304(thickness 2.0mm)

Insulation

Material Polyurethane(50mm)

Work pressure 0.9 MPa

Testing pressure 1.2 MPa
